

One video. Four simple steps.

Two Telegram groups. One clear path from footage to finished edit.

UPLOAD

Send footage + instructions

Post in the Uploaders group. A source-folder link works too.

ASSIGN

The bot chooses an editor

Available editors share work by allocated effort. Admins and the group owner are excluded.

EDIT

Start, edit, then reply

The assigned editor taps Start editing and sends the finished file through Submit edit.

REVIEW

Approve or request changes

An admin reviews the result. Approved edits return to the Uploaders group.

YOUR HOME BASE

Open the pinned Team controls message in the Editors group. Commands remain optional shortcuts.

Send the footage. We handle the queue.

Use the Uploaders group for new videos and finished results.

1

Post one video per job

Attach the video and describe the edit in its caption. Avoid albums for separate jobs.

2

Working with a folder?

Paste a shareable source link with instructions. Make sure the editor can open it.

3

Watch for assignment updates

The bot tells you who has the video and when it is due. If everyone is busy, the video waits.

4

Receive the approved edit

The finished submission returns here after approval. No need to chase editors individually.

A GOOD BRIEF

Example: Add English captions, remove long pauses, and export vertically. Include any reference or brand instructions.

Tap. Edit. Send it back.

Join the Editors group. Existing members can say Hi once to register.

1

Open My tasks

Find your videos through Team controls. Each status card shows the editor, due time and next action.

2

Tap Start editing

The deadline starts when the assignment is delivered, not when you tap Start editing.

3

Tap Submit edit

Reply to the bot question with your video, document or download link. You can also reply to the original assignment.

4

Stuck? Tap Need help

Reply with what is blocking you. Admins are notified; your clock continues unless an admin extends it.

AFTER YOU SUBMIT

Deadline alerts stop while an admin reviews. If changes are requested, revise and submit again with the fresh deadline.

Manage the work. Use the buttons.

Only configured bot admins can use management actions.

REVIEW

Approve / Request changes

Open Waiting for review. Approve the finished edit, or tap Request changes and reply with feedback.

REASSIGN

Change editor

Reply with the reason. The same video returns to the queue for a different editor, with a fresh deadline on delivery.

ADJUST

More time / Cancel video

More time asks for extra hours and a reason. Cancel video asks for a reason before closing the job.

TEAM

Editor availability

Choose Pause or Resume beside a name. Pausing stops new assignments; existing deadlines continue.

CHANGED YOUR MIND?

Reply Never mind to stop a guided action. Questions expire after one hour or when the video changes. Open the latest card to try again.

Know what is due. See what gets done.

Automatic reminders support the team without daily status chasing.

24h

Default delivery window

Each new delivered assignment gets 24 hours by default. An admin can grant more time.

6h / 2h

Due-soon reminders

The editor is reminded before the deadline. At the deadline, an unsubmitted video is escalated to admins.

2 JOBS

Default active-job limit

Each editor can hold two active jobs by default. Submissions awaiting review still occupy a slot.

WEEKLY

Review progress together

Weekly charts cover workload, completion, timeliness and first-pass approval. Admins can also tap Weekly report.

FAIR ASSIGNMENT

Among available editors with capacity, the bot picks the lowest allocated effort. Paused editors and admins receive no new work. Defaults can be configured.
